

Erica Boyd – Bio

I began working as a transcriptionist for Mercy Health Partners of Southwest Ohio in 1999. I still work for them today, becoming a lead transcriptionist in 2002. I had attended numerous BAC-AHDI symposia until I was asked to run for the position of secretary and was elected for the 2009-2011 term. I created the BAC-AHDI Facebook page to try to keep our members informed of upcoming webinars and symposia. During my "free" time, I take online classes through AHIMA, and I was just accepted at Cincinnati State Technical College into the government grant-sponsored Health Information Technology program. Over the years I have enjoyed meeting with other people who really care about their profession and like what they do for a living. As President, I hope to keep the same level of professionalism as our predecessors and be a good leader to the membership.
